NA82: Mentha piperita oil (peppermint oil)
CAS#: 8006-90-4

Patient Information
Your patch test result indicates that you have a contact allergy to mentha piperita oil. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is mentha piperita oil found?
Mentha piperita oil is used in various food products for flavoring, including teas, ice cream, candy, chewing gum, and toothpaste. This substance can also be found in household items with a minty aroma such as shampoo, conditioner, lotions, and soaps.

How can you avoid contact with mentha piperita oil?
Avoid products that list any of the following names in the ingredients:
- FEMA No. 2848
- HSDB 1900
- Mentha piperita oil
- Oil of peppermint
- Oils, mentha piperita
- Oils, peppermint
